Professional Summary

Software Developer skilled in React.js, Node.js, and Python, with experience in full-stack development. Built and deployed web applications and APIs on cloud platforms that support real-time systems. Experience in integrating AI and NLP models using APIs such as Hugging Face and other open-source tools.

Technical Skills

- **Languages:** Java, C, Python
- **Web/Backend:** HTML, CSS, JavaScript, React.js, Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Cloud/DevOps:** AWS, Vercel, Render, Linux, Docker
- **Tools:** Git, GitHub, Postman, Jira, Trello

Projects

Prompt Forge AI - [Repo](#) | [Live](#) 2026

React.js, Tailwind CSS, Python, FastAPI, Gemini API, Groq API, Hugging Face

- Developed an AI-powered prompt optimization platform for generating structured and high-quality prompts
- Built a responsive frontend using React.js and Tailwind CSS with real-time processing
- Integrated multiple AI models (Gemini, Groq, Qwen) to generate and compare prompt variants
- Implemented benchmarking and speech-to-text features for improved usability

Hanoi Arena - Full-Stack Multiplayer Web App - [Repo](#) | [Live](#) 2026

React.js, Node.js, Express.js, Socket.IO, MySQL

- Developed a real-time Tower of Hanoi gaming platform with authentication and leaderboard system
- Optimized backend and WebSocket connections to support 180+ concurrent players
- Built an admin panel for managing game settings and tournaments
- Implemented API testing and security using Postman and JWT-based authentication

Enquiry Chatbot - [Repo](#) | [Live](#) 2025

Python, Flask, React.js, TensorFlow, NLTK, Keras

- Built a full-stack AI chatbot using NLP and neural networks for intent classification
- Implemented text preprocessing with tokenization and stemming using NLTK
- Trained and deployed a TensorFlow/Keras model for real-time response generation
- Deployed and monitored the application on Render cloud with performance optimization

Experience & Achievements

Academic Projects & Event Coordination 2023 – Present

- Designed, built, and deployed full-stack applications using React.js and Node.js, integrating RESTful APIs and optimized databases
- Developed AI-based applications using tools and APIs such as Hugging Face, including NLP-based solutions
- Coordinated an AI Project Expo at college, managing project presentations, team collaboration, and overall event execution
- Optimized systems to support 180+ concurrent users and deployed applications on Vercel, Railway, and Render

Education

Bachelor of Engineering in Computer Science and Engineering CGPA: 8.45
Government College of Engineering, Erode, TN 2023 – Present

Certifications

- Java Certification – HackerRank 2025
- Problem Solving Certification – HackerRank 2025
- Programming Foundations with JavaScript, HTML & CSS – Duke University (Coursera) 2025
- Crash Course on Python – Google (Coursera) 2025
